

UTILITY SUBSTATION SOLUTIONS

Protect, verify, and act on potentially critical events

Voice Talk-Down

Networked talk-down speaker triggered by the video surveillance system warns intruders with pre-recorded messages. An optional IP microphone at the SCADA center provides two-way communication.

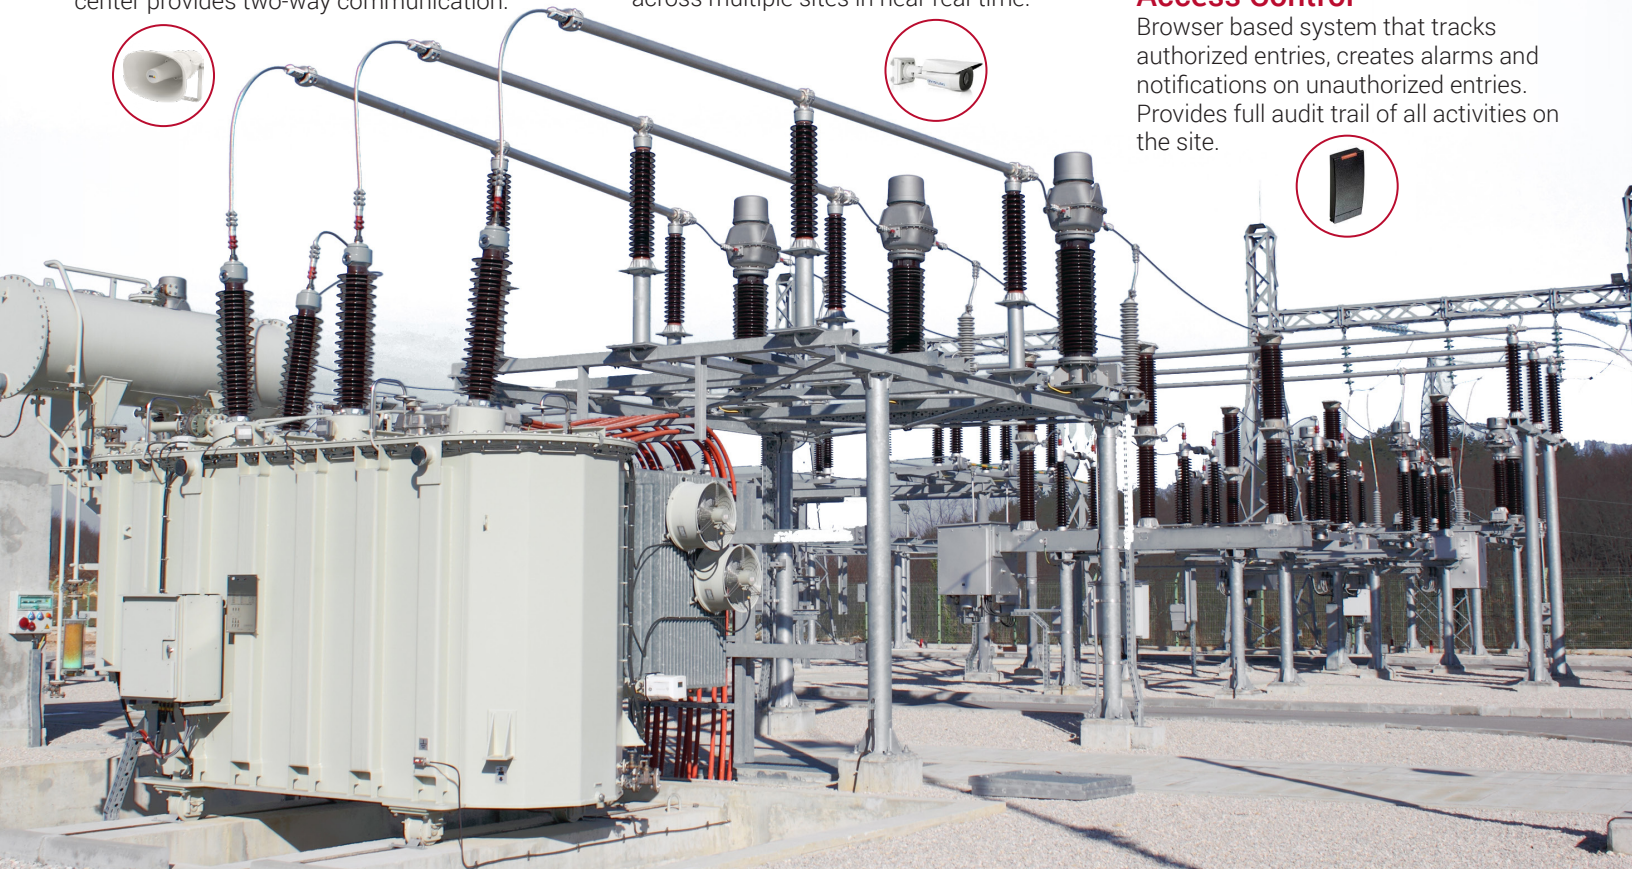

AI Powered Video Surveillance

From passive surveillance to active monitoring for trespassing, vandalism, theft, and overall perimeter protection, even in complete darkness. Search through data to quickly locate a specific person or vehicle across multiple sites in near real-time.

Access Control

Browser based system that tracks authorized entries, creates alarms and notifications on unauthorized entries. Provides full audit trail of all activities on the site.

Of the most critical infrastructure that communities rely on, none is more vital than electrical utilities that deliver energy to our homes and businesses.

EMC SECURITY PROVIDES:

- Certified ITS Keyholder Technician.
- Supports NERC CIP regulations.
- Scalable solutions. Non-proprietary equipment designed for future expansion.
- Video monitoring service.
- Dual cellular communication capability.
- Free training.
