# Arming Functions

---

Select the **STAY** icon to arm your system while you are still on the premises. Motion detectors will be disabled.

**Stay**

Set your security system to **AWAY** when you plan to be off premises. This setting keeps all motion detectors active.

**Away**

Armed **NIGHT** is for when you are on premises overnight. Your security will arm immediately without an exit delay, motion detectors can be turned off so you can move about freely, or active to enhance intrusion security.

**Night**

When arming your system to **STAY** or **AWAY**, an **EXIT DELAY** count-down will start, leaving you time to exit the premises before an alarm is triggered.

**Disarm**
